

THIS IS Y.

# PREVENTING SUMMER SLIDE

Summer learning opportunities significantly contribute to a child's academic achievement and help foster their social, physical, and emotional growth. In 2022, our Y camps engaged **1,100 youth** in science, art, self-expression and creative thinking which helps reinforce what they learned during the school year.

By supporting Y Summer Camp, youth have the opportunity to participate in fun, educational activities that help prevent summer learning loss.

The average student loses **1-2 months** of math & reading skill learnings over the summer, also known as "Summer Slide".

**Better Together.**
